

MaxBlast™ Maximum Protection Construction

The Sea-Dog MaxBlast trumpet and compact horns have an injection-molded plastic cover over the painted steel cover that provides complete protection from the marine environment. All of the MaxBlast over-molded horns have gone through a number of 600 hour salt spray tests (ASTM-B-117-11) with no signs of rust or corrosion. By using this incredibly effective over-molding process, the added cost becomes much less than other rust-proofing methods, allowing Sea-Dog to provide a full coverage 5 year warranty at an economical price.

NEW OUT OF THE BOX

AFTER 600 HR SALT SPRAY TEST

NO RUST OR CORROSION AFTER 600 HOURS!

An injection-molded housing under the stainless steel cover protects the steel cover from rusting, leaving it completely rust-free after a 600 hour salt spray test.

These horns come with a FIVE YEAR warranty and meet ABYC standard A-23, NMMA type accepted #748120 for use on vessels under 39'. 12 volt DC.
