CABIN DOOR HANDLE LATCH SET

INSTRUCTIONS

For doors which are $1\frac{1}{4}$ " to $1\frac{1}{2}$ " (32 to 38 mm) thick, use brass shaft as is, without cutting it.

For doors less than $1\frac{1}{4}$ " (32mm) thick, use hacksaw to cut square brass shaft to X length.
 $X = [\text{door thickness}] + 1\frac{11}{16}$ "

Drill bore holes and cut out slot for latch mechanism. Use this card as a template for mounting holes.

Check the direction of the latch before mounting. Ensure it is correct for your door opening direction.

Check the rotation of handles before mounting. Install so the handles rotate downwards.
